

# NetWork

Jenelle Gilliland, Emmaleigh Hawkins, Ethan Richards, Katie Schultz

## THE PROBLEM

The percentage of women working in CS has gone down from 35% in 1990 to just 18% in 2013. There is a lack of resources for women in CS to feel supported & make meaningful connections in the industry.<sup>1</sup>

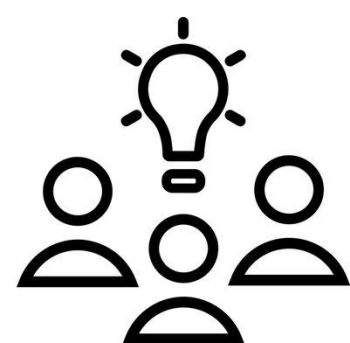

## OUR SOLUTION

NetWork is a proposed mobile app that provides connection through events and mentoring to help women have access to resources for the hiring process.

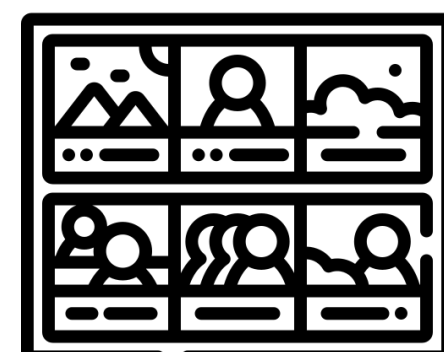

Main functionality: 1) enable women in CS to find job opportunities with networking events 2) provide women in CS with better opportunities to directly connect with mentors.

## THE DESIGN PROCESS

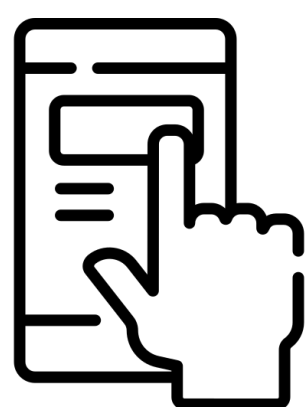

Project Ideation

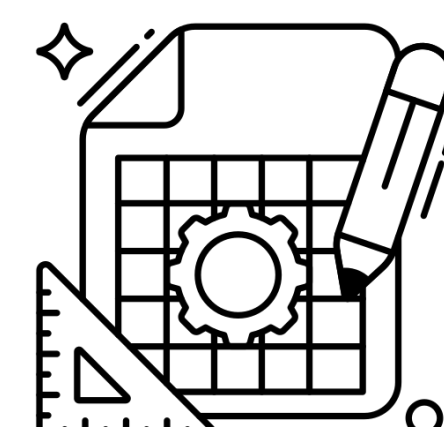

Design sketches

Usability Testing

Paper Prototyping
